Using the Mediasite Interface

Once you click on the live streaming link (see email) the Mediasite interface will be displayed with two main screens (see picture below). One screen captures the presenter; the other screen captures the computer.

You will have the opportunity to ask questions of the presenter. You may submit a question at any time. The presenter will stop to respond to questions twice during the presentation.

To submit a question:

1. Click the Ask Question button located at the bottom of the Mediasite screen.
2. Enter your name, email address, subject, and question
3. Click the Ask Question button to send your question.
**Changing the view:** The controls located in the upper right corner of the Mediasite window enable each user to *customize the view* if desired. Place your mouse over the icons to learn about the options. If you wish to change the display, click the appropriate button.

**Individual Support**

We will be unable to provide individual support during the workshop.
