

2006 Outstanding Professor Lecture

# TWINS AND VIRTUAL TWINS:

Insights Into Human Behavior

**DR. NANCY L. SEGAL**

will describe the logic behind twin research, then discuss findings and implications from twin studies examining a range of human behavioral and physical traits, such as intelligence, social relationships, athleticism and sexuality. She will share insights from her recent book, **Indivisible by Two: Lives of extraordinary Twins**, and speculate as to where twin research is likely to head in the future.

**Monday, April 17, 2006**

**11:00 am**

**Titan Student Union, Pavilions**
